

#### Future cooperation topics:

- TOURISM
- EDUCATION (from the smallest children to lifelong)
- THE CULTURE, HABITS AND TRADITIONS (cultural heritage, e.g. museums, propagation, music events....)
- THE IDENTITY OF THE REGION (local patriotism, the cooperation of municipalities)
- THE LOCAL ECONOMY (production)

#### ○ TOURISM

Further expansion of the outputs of the previous LAG's projects outputs - „Linz path“ and „Join Peklík for a trip“:

- supplement the databases of cultural and natural attractiveness, the extension of Mobile guide „Linz path“ (including collective history, trade paths along the Dunaj river, also towards the Salzkammergut)
- extension of Mobile guide „Join Peklík for a trip“ – including attractiveness of the tourism industry in South-western areas of Bohemia towards Austria and Bavaria. (currently covers regions of LAG Rozkvět and LAG Blanský les between České Budějovice and Lipensko), functional interconnection on both sides of border (cross-border function)
- involvement in the common system „for visitors of the Dunaj-Vltava“ (the visitors card, competitions included in mobile applications,...)

Mirror type projects Local educational trail (with adventure components, outdoor gyms and relaxing places (stops)...):

- Fruit trail, arboretum of old traditional varieties (municipalities of Chelčicko-Lhenicko microregion)
- A Rural Baroque trail, traditional old village rural architecture (municipalities of Blata microregion)
- Villages lost in time (municipalities of Lipensko and Pošumaví/ Lhenicko region)

The processing of cross-border, as well as local sub-strategies (concepts) of tourism –list of thematic tourist paths (trails), area/local/stay based packets, preparation of local destination management offices

Marketing interconnection of local opportunities for tourists

(the possibility to utilize existing cooperation between high schools and high technical schools educating in tourism in České Budějovice, Bad Leonfelden a Grafenau)

Establish communication between the information centers and sharing a data

Establish communication between the tourist communities, alternatively. between associations

Infrastructure –cross-border transportation network (communication, transport services) –area of Lipno region (relation/links to Austria and Bavaria region)

Education and training of local tourist guides, local scenarios processing (itineraries for the local churches, the village square, the pilgrimage chapels ....)

- EDUCATION (from the smallest children to lifetime)

German to life

- Interactive classes for pre-school (3-6) and junior school (6-15) age and their parents with a link to local partners in border areas (kindergarten, maternal centers) – teaching materials and methods, classes for teachers (both professional and non-professional), organization of summer and weekend stays/camps including foreign stays
- Activation of teaching German at the 2<sup>nd</sup> level of elementary schools (6.-9. class) – incentive stays with accompanying program in cooperation with Austrian and Bavarian schools (technology, creative activities, visual/art activities, meetings of music, sport and theatre and dance schools, joint projects events – strengthening of links not only between schools, but also between schools and “their” villages and families
- Virtual common classes at the level of elementary school (also trilateral CZ+GE+EN, e.g. mathematic) – educational cooperation
- Future language education of adults using interesting methods – animations, experiences, the movie (common stories), summer schools ...with the aim of mutual knowledge and understanding each other culture and strengthen relations between societies

Technique for children – to support technical education (manual and technical skills) in preliminary and elementary schools, linking with high schools, faculty of education, technical universities and companies

Awareness training and education in the field of life saving – giving first aid – practice of human behavior during elemental and emergency situations (for children, young and adult people; preparation methodologies and education practices, sharing videos, summer academies, experience camps/stays ...)

Archeological and historical research and its popular-scientific interpretation (publications, exhibitions, movies, work-camps,....)

- Villages lost in time
- Changes in rural areas after the 2<sup>nd</sup> World War
- Linz path / medieval trade paths/routes
  
- Excursion into working environment, conferences, exhibitions, ...
- For students preparing for the next career
- For students of high schools

- For employers (objectives: introduction into the system of dual education, functioning of cooperation of clusters)
- THE CULTURE, HABITS AND TRADITIONS (cultural heritage, e.g. museums, propagation, music events....)

#### Hunting

(the project: The extension of shooting training area, the creation of facilities for cultural meetings, public awareness and education-themed village Sedlec and the local part of the Malé Chrášťany)

#### The local Museum

creation of a network of local museums-provincial and cross-border (joint promotion, favourable conditions for the "common" visitors)

#### Cultural events / festivals

- Amateur theatre, amateur music, music of all kinds
- Wood-carving, work with other natural materials (straw, construction with willow twigs)

#### • THE IDENTITY OF THE REGION (local patriotism, the cooperation of municipalities)

Volunteering – experience of recruiting in urban and rural locations, working with high school students

Community driven local development – experience with organizing public forums, participative involvement of youth, working with the public

#### • THE LOCAL ECONOMY (production)

Sales from our gardens, courtyard, etc. .

- Transmission of real operational practice
- Create a local supply networks-Regional/local fair trade
- Social business – how to do it in practice and without subsidies
- The operation of the overarching e-shop for local (non-food) producers
- Create a local cooperatives for food production (dairy, brewery, cider/Apple juice plant, fruit drying, etc.) – legal and administrative formalities, the appropriate technical and technological solutions, cooperation

Clusters-networking across borders, the involvement of Czech companies and organizations (and municipalities), for example, in a cluster of "wood"

Energetic self- sustainable regions — the transfer of experience and know-how in creating local networks (joint organization of the municipalities, the involvement of citizens and businesses), local and regional energy management, electromobility

Energeticky samostatné regiony – přenos zkušeností a know-how vytváření lokálních sítí (společné organizace obcí , zapojování občanů a firem), lokální a regionální energetický management, elektromobilita
